To the first of these classes, it does not make the slightest difference to what they do or do not be long. Utter ladifference is felt as to their acts or their bubble. The day will soon be upon them when they will be filled with poignant regret, and essays for the United States govern- they will cause the hour in which they committed their folly. The toneuts and aims of these scoleties are not new to the American people. Three times within the momory of persons living similar organizations have appeared in the United States.
